

TVAR Solutions and Veritas

Improving IT Performance for U.S. Navy and U.S. Marine Corps Organizations with Health Checks

U.S. Navy and U.S. Marine Corps organizations rely heavily on Veritas software and services for enterprise data management and backup services. As Veritas transitions its client base from traditional software licensing models to capacity-based licensing models, many Navy and Marine Corps organizations require expert assistance to ensure those transitions optimally support and benefit their complex IT environments.

TVAR Solutions, a small business enterprise solutions provider that solves complex technical challenges for federal and Defense Department organizations, works closely with Navy and Marine Corps organizations to ensure those Veritas licensing transitions are optimized for their infrastructures and mission needs.

As a proud Veritas Federal Platinum Partner, TVAR Solutions has the ability to provide Navy and Marine Corps customers no-cost health checks on their Veritas environments and configurations. These health checks promote greater efficiency, ease of operation, better performance, greater alignment between license entitlements and usage, and improved planning for the future.

Each health check employs a 4-step process:

- [Data gathering](#)
- [Data analysis](#)
- [Recommendations](#)
- [Presentation](#)

As part of the health check report, customers receive:

- [A policy summary](#)
- [Deduplication information](#)
- [NetBackup domain – data volumes](#)
- [A capacity summary](#)

Depending on the specific needs of the customer, the health check may also include some or all of the following:

- [A NetBackup catalog](#)
- [A NetBackup appliance hardware summary](#)
- [A NetBackup domain review](#)
- [A listing of the longest-running backup jobs](#)

TVAR also supports Navy and Marine Corps clients with testing and maintaining mission-critical legacy applications to ensure high availability and business continuity.

TVAR and Veritas have reliably supported Navy and Marine Corps clients for more than a decade, going the extra mile to ensure their problems and pain points are addressed satisfactorily. Our clients include:

- [NAVSEA](#)
- [NAVAIR](#)
- [System Commands \(NIWC PAC/LANT\)](#)
- [Naval Shipyards](#)
- [Naval Research Lab](#)

Navy and USMC organizations can access Veritas products and services on DoN ESL for Veritas II (Carahsoft) and DoD ESI (Carahsoft).
