

NetBackup Appliance Solution Helps U.S. Federal Agency Achieve Optimized Storage and Data Protection

TVAR Solutions works closely with the customer's federal integrator to update an outdated backup solution.

Challenge

A U.S federal government agency faced an overextended and aging NetBackup solution requiring extensive hours to complete backups. The integrator team needed help maintaining their essential tasks while working around the clock to manage and protect their data.

Solution

TVAR Solutions collaborated closely with the integrator and Veritas to build an ideal Veritas NetBackup Appliance solution to manage multiple site and volume requirements by leveraging the customer's existing backup solution. As a result, the new solution allowed the integrator to successfully and securely provide required backups; while allowing the customer to return to a regular work schedule and perform all required duties.

The Industry-leading Solution for Effective Data Management

TVAR Solutions, in partnership with Veritas, offers a variety of solutions to help federal organizations meet their data management and protection goals. As an 18x Magic Quadrant leader in data center backup and recovery solutions, TVAR leverages Veritas as a proven solution to help federal agencies gain control over their data and data management.

Together, Veritas and TVAR offer secure and optimized data management solutions. Equipped with a dedicated reseller support staff and seasoned representatives, TVAR and Veritas have decades of experience inside federal environments and deployments. They combine this insight with deep technical knowledge and a best-in-class partnership to help our clients achieve IT modernization. About Veritas

Veritas Technologies is a leader in multi-cloud data management. Over 80,000 customers—including 95 percent of the Fortune 100—rely on Veritas to help ensure the protection, recoverability, and compliance of their data. Veritas has a reputation for reliability at scale, which delivers the resilience its customers need against the disruptions threatened by cyberattacks, like ransomware. No other vendor is able to match the ability of Veritas to execute, with support for 800+ data sources, 100+ operating systems, 1,400+ storage targets, and 60+ clouds through a single, unified approach. Powered by Cloud Scale Technology, Veritas is delivering today on its strategy for Autonomous Data Management that reduces operational overhead while delivering greater value.
