TVAR Solutions Awarded Spot on NASA SEWP VI Contract

MCLEAN, VA – TVAR Solutions, a leading small business enterprise IT provider for the Federal Government and Systems Integrators, today announced it has been awarded a contract under Category A of NASA’s Solutions for Enterprise-Wide Procurement (SEWP) VI Government-Wide Acquisition Contract (GWAC).

NASA recently selected 364 contractors under Category A for the program’s next generation of federal IT procurement. This category comprises a diverse mix of technology providers, systems integrators, cybersecurity firms, cloud specialists, and IT resellers supporting federal agencies nationwide. The SEWP VI vehicle streamlines federal access to cutting-edge IT products and services, allowing agencies to rapidly meet evolving mission requirements.

“We are incredibly honored and excited to be selected for NASA SEWP VI,” said Sam O’Daniel, President and CEO of TVAR Solutions. “This award represents a significant opportunity for TVAR to expand our support of Federal agencies with innovative technology solutions and exceptional service. We look forward to helping our customers accelerate mission success through this highly respected contract vehicle.”

Through SEWP VI, TVAR Solutions will deliver enterprise IT solutions, cybersecurity technologies, cloud offerings, and emerging capabilities that enable agencies to modernize securely.
